

Billoid for HasOffers

Intelligent invoicing and crediting solution

What is Billoid?

Billoid is a comprehensive invoicing solution tailored for the HasOffers platform. Taking the hassle out of client billing, Billoid simplifies the task of invoicing, crediting accounts, payment management and collecting on delinquent payments. The solution creates customized advertiser invoices and affiliate credit notes for HasOffers network and agency clients.

In addition, Billoid helps with the management of tax documentation. Streamlining the process of generating and filling in tax forms or contracts with advertisers and affiliates, Billoid stores them within the customer profile. This robust solution is for networks that require custom invoice layouts, form management or payment control.

Benefits of Using Billoid

The Billoid integration with HasOffers makes it quick and easy to manage the invoicing and crediting process. Removing the hassle and monotony involved with customer invoicing and managing tax forms, Billoid enables networks and agencies to focus their time on their core business. Through integration with money transfer services—Payoneer, PayPal and Tipalti—Billoid also has payment control capability, providing visibility into which advertiser invoices have been paid or not.

Furthermore, Billoid helps with the timely collection of payment from customers. Through defaulting management, Billoid increases advertiser payment by sending out billing reminders. And, the digital form management functionality helps with getting mandatory tax forms signed before affiliates are paid.

Features of Billoid include:

Invoicing and Crediting - Create custom invoices and credit notes for your advertisers and affiliates with the revenue and payout data collected by HasOffers.

Digital Form Management - Manage tax forms and other documents easily. Send customized or template documents to your advertisers and affiliates. This allows them to conveniently upload and sign the document, while you stay organized and compliant.

Defaulting Control - Encourage timely payment behavior of your customers. The defaulting management tool shows all overdue invoices and allows you to send email notification reminders to your clients.

Mass Payout Integration - Export CSV files with payout data to process mass payouts through our integrated partners—Payoneer, PayPal and Tipalti.

Bulk Mail Distribution - Send out invoice documents and forms via the smtp account of your choosing, directly through the system.

About HasOffers by TUNE

HasOffers provides unbiased attribution analytics for performance advertising. Fully customizable software for managing campaigns, creative, publishers, invoices, payouts and more at a detailed level—in real time. We believe that better attribution technology in the hands of online and mobile marketers creates higher performing advertising relationships that ultimately generates the best value for advertisers. With a mission to make mobile marketing better for everyone, TUNE (www.tune.com) creates Software-as-a-Service (SaaS) products to help marketers manage performance advertising relationships across mobile and desktop.
